

Border welded around edge allows concrete to be cast up to junction box without flowing over onto cover.

Direct Burial Junction Box

- Used in instances where junction box must be located in concrete or at grade, but still remain accessible through a screw cover.
- Junction boxes and pull boxes are constructed with all welded seams. Material is 12 gauge galvanized sheet steel, conforming with ASTM A-924 & G90.
- Boxes are provided with gasketed diamond plate screw covers.
- Total custom capability allows us to meet a wide range of customer needs. We can supply special sizes, shapes, holes, or cutouts.
- Junction boxes can be hot dipped galvanized after fabrication upon customer request.
